

Amber Nicole Dilger

Hospitality/Tech Rider

Performance Tech Requirements:

- piano, recently tuned and in good repair
- music stand
- water (filtered or bottled) at room temperature
- mic/amplification system appropriate for performance space (we want everyone to easily hear)
- sound check 30-45 minutes before start of show
- a private space with 2 chairs for accompanist and I to wait before performance begins
- a stool for the performance area would be ideal, if you have one

Program Scheduling

Fluorescent lights (including Compact Fluorescent) are a migraine trigger for me. When scheduling programs or performances, please note that I have a max. tolerance of 2.5 continuous hours in this type of lighting. As an alternate, we can do 2 hours in the lighting followed by a 3 hour break, and then 2 more hours in the lighting.

I have a Keynote/Powerpoint presentation to use that would be very helpful for group programs if a projector system is available.

Travel/Lodging

Please forward details as soon as possible.

If you are arranging our **travel**, we prefer to arrive a full day before the first program to allow for any unforeseen travel challenges.

When **lodging** is part of the agreement, we appreciate 2 rooms in a safe and comfortable, *dog-friendly* place in town.

Thank you, in advance!

A great program happens because of the planning of many people ahead of time. Thank you for being part of creating the magic.

If you have any questions, please don't hesitate to contact me. Email is best before I travel to your town. When I'm in town, it's more expedient to use my cell to call or text.
